

## 2018-2019 Water Service Lead Replacements

The City of Owosso received funding from the Michigan Department of Environmental Quality (MDEQ), for a Pilot Drinking Water-Community Water Supply Grant. The purpose of this grant is to fund the location and identification of lead and galvanized steel water service lines, create an inventory of these service line pipe materials where located, plan and schedule the removal of these particular metal pipes, and physically remove these water piping services within available funding.

The City has identified water services that are comprised of full, or partial, lead and galvanized pipe. The areas shown on the attached map only represent what is known at this time and additional locations of lead and galvanized services are anticipated. The City intends to utilize a portion of the MDEQ grant to replace some of these water services which are located both on private and public property. A construction contract is currently being developed and a project start date in late November 2018 is anticipated. To complete these projects, the City will need access to private property and access the residence in order to complete the service upgrade to the water meter. All affected property owners will be notified of the project and City's intentions.

**Properties that have been identified as having a lead or galvanized water service lines.** You will be contacted in the near future to discuss and hopefully schedule the replacement of your water service line at no cost to you. Please contact Dave Haut, Water Treatment Superintendent at 989-725-0560 or email at [dave.haut@ci.owosso.mi.us](mailto:dave.haut@ci.owosso.mi.us) to schedule a site visit. The following list of properties have been identified as having either full or partial services that contain lead or galvanized steel:
